

## **Progress Report for Sarah Lawrence Adaptive Design – Month 3**

For the third month and final month of the fall semester, SLAD continued developing interactive devices through testing potential programs and physical cardboard designs. Three cardboard tablet holders were also finished and will be given to the Harts for Hope program at the beginning of the spring semester so the holders can be painted and decorated by the residents of Wartburg.

November 20:

- Visited Wartburg to demonstrate cardboard prototypes and finalize design
- Met with Ann Frey, Director of Volunteers, and discussed moving forward with the Raspberry Pis and Arduinos

November 30:

- Held Adaptive Design meeting
- Continued work with cardboard tablet holders
- Installed operating systems onto the Raspberry Pis

December 14:

- Held Adaptive Design meeting
- Completed cardboard tablet holders
- Tested installation of simple video games onto a Pi

December 18:

- Met with Ann Frey, Concetta Tomaino, Megan Jablonski, Meredith Frey, Mara Gross, and Christine Drasba to discuss adaptive design and potential collaborations within SLC and between SLC and Wartburg
